ABOUT STRATEGIC SCHOOL FUNDING FOR RESULTS (SSFR)

What is the purpose of SSFR?

During the 2009–10 school year, American Institutes for Research (AIR) and Pivot Learning Partners (PLP) formed a partnership with two large California school districts—Los Angeles Unified School District and Twin Rivers Unified School District—to implement and evaluate the impact of a comprehensive approach to local school finance and governance reform that creates the conditions for improved human resource management and a more equitable distribution of both resources and student learning opportunities. The *Strategic School Funding for Results* project (SSFR) was designed to (1) develop and implement more equitable strategies for allocating resources within each district; (2) make budget and resource allocation decisions more transparent; (3) link those strategies to policies and processes designed to encourage autonomy, innovation, and efficiency; and (4) strengthen accountability for improving student outcomes.

What policies underlie SSFR?

The core reform strategy offered by SSFR includes four basic elements: equity, autonomy linked to accountability, transparency, and a culture of innovation and efficiency.

- 1. SSFR achieves equity by implementing a student need-based funding model**, and by developing and implementing policies, processes, and tools (the Targeted Revenue Model, or TRM) that support allocating dollars, rather than staff, to schools based on the needs of the specific students they serve (e.g., low-income students or English language learners).
- 2. SSFR links school autonomy to accountability** by offering schools discretion over how they use the dollars they receive and holding schools accountable for the results (student outcomes). SSFR includes a site budgeting tool (the Planning, Budgeting, and Allocation of Resources tool, or PBAR) that engages school decision makers in a series of activities that includes a needs assessment, goal setting, and the specification of instructional strategies and resource allocation necessary to achieve the goals with available revenues.
- 3. SSFR promotes increased transparency** by simplifying and clarifying the processes by which resources are allocated to schools, increasing the participation of a wide range of stakeholders in the design of these processes, improving stakeholder access to information about the patterns of resource allocation and student outcomes within the revenue allocation and site budgeting tools, and simplifying the structures that support resource allocation decisions.
- 4. SSFR promotes a culture of innovation and efficiency**. As these strategies are successfully implemented, SSFR encourages a culture of school innovation to improve performance and attract students and families; provides a structured, site-based budgeting tool in the context of a fixed revenue constraint; and encourages school leaders to operate efficiently to produce the best possible results.

What were the benefits of participation in the SSFR project?

Within the framework of the SSFR project, the AIR/PLP team provided the districts with data tools and analysis, technical assistance, coaching, and training to implement the funding strategies and evaluate their success. While common themes were promoted across the two

participating districts, each adopted its own focus and is now adapting the SSFR components to fit its unique culture and context. Each of the participating districts committed time on the part of its leadership and staff to participate effectively in this project and acknowledged that the project was a collaborative effort between the AIR/PLP and district leadership teams. The formative nature of the project allowed for a mutual learning experience among the participating districts and the AIR/PLP team and the creation of a strong partnership in successfully implementing SSFR. The SSFR project has resulted in a series of reports and guidebooks that describe the implementation of SSFR, as well as the changes in patterns of resource allocation and student outcomes that coincided with the efforts of the AIR/PLP team to implement SSFR in the two districts. For more information, see the SSFR website at www.schoolfundingforresults.org.

How was SSFR funded?

During the 2009–10 school year, the William and Flora Hewlett Foundation and the Ford Foundation provided grants to the AIR/PLP team to support the first phase of the SSFR work. August 1, 2010, marked the beginning of Phase II of the project, when the Institute of Education Sciences (IES) in the U.S. Department of Education awarded a grant of \$1.67 million to the AIR/PLP team to support the development of the SSFR model for three more years. The Hewlett Foundation awarded an additional three-year grant of \$1.5 million to the AIR/PLP team to extend its support of the project over the same three-year period. The Ford Foundation also contributed \$200,000 to support SSFR work during 2010–11.

Twin Rivers Unified School District

Principal Survey

Spring 2012

About the SSFR Principal Survey

Purpose of the study	The American Institutes for Research (AIR) is conducting a study of the Strategic School Funding for Results (SSFR) Initiative in two school districts: Los Angeles Unified School District and Twin Rivers Unified School District. This project is funded by the U.S. Department of Education Institute for Education Sciences.
Purpose of the survey	This annual survey will help us understand how school and district policies and your role and practices as an administrator change over time as this Initiative is rolled out, if at all.
Confidentiality	Your answers to the questions in this survey will be kept strictly confidential. Results from this survey will never be presented in a way that would permit any response to be associated with a specific school or individual. Only aggregate results- not individual responses- will be provided to Twin Rivers district staff. We will present findings such as, "62 percent of principal respondents reported having significant influence over spending their school's budget."
Benefits	Your participation gives you the opportunity to share information about your experiences with the SSFR Initiative as a school administrator. Confidential, aggregate feedback based on the results of this survey will be provided to district leaders. This will provide district leaders with information about principal experiences with this Initiative. The district's goal is to use this information to improve the SSFR Initiative.
Freedom to withdraw	Your participation in this survey is voluntary. You have the right to stop participating at any time without penalty. However, we encourage you to participate, as your input is critical to understanding how SSFR policies are affecting schools and SSCs.

Risks and discomforts

There are no foreseeable risks associated with participation other than the inadvertent release of the data. However, to minimize this risk, there will be no names included on surveys, and you are being asked to place your survey into an envelope with all other surveys to return directly to AIR so no one at Twin Rivers can see your responses when you turn it in. At AIR, surveys will be seen only by authorized project staff, entered into a secure database, and hard copies will be stored in a locked cabinet.

More information

If you have any questions or would like further information about this survey, please contact Lisa Cruz at 650-843-8272 or lcruz@air.org. For questions regarding your rights as a participant in this study, you may contact AIR's IRB chair at IRB@air.org or 1-800-634-0797.

If you decide to complete and return this survey, you are indicating that you understand and agree to the above.

Thank you for your participation!

Twin Rivers Unified School District

School Site Council Survey

Spring 2012

About the SSFR School Site Council Survey

Purpose of the study

The American Institutes for Research (AIR) is conducting a study of the Strategic School Funding for Results (SSFR) Initiative in two school districts: Los Angeles Unified School District and Twin Rivers Unified School District. This project is funded by the U.S. Department of Education Institute for Education Sciences.

Purpose of the survey

This annual survey will help us understand how school and district policies and your role and practices as a School Site Council member change over time as this Initiative is rolled out, if at all.

Confidentiality

Your answers to the questions in this survey will be kept strictly confidential. Results from this survey will never be presented in a way that would permit any response to be associated with a specific school or individual. Only aggregate results- not individual responses- will be provided to Twin Rivers district staff. We will present findings such as, "62 percent of SSC respondents reported having significant influence over spending their school's budget."

Benefits

Your participation gives you the opportunity to share information about your experiences with the SSFR Initiative on the School Site Council. Confidential, aggregate feedback based on the results of this survey will be provided to district leaders. This will provide district leaders with information about SSC experiences with this Initiative. The district's goal is to use this information to improve the SSFR Initiative.

Freedom to withdraw

Your participation in this survey is voluntary. You have the right to stop participating at any time without penalty. However, we encourage you to participate, as your input is critical to understanding how SSFR policies are affecting schools and SSCs.

Risks and discomforts

There are no foreseeable risks associated with participation other than the inadvertent release of the data. However, to minimize this risk, there will be no names included on surveys, and you are being asked to place your survey into an envelope with all other surveys to return directly to AIR so no one at Twin Rivers can see your responses when you turn it in. At AIR, surveys will be seen only by authorized project staff, entered into a secure database, and hard copies will be stored in a locked cabinet.

More information

If you have any questions or would like further information about this survey, please contact Lisa Cruz at 650-843-8272 or lcruz@air.org. For questions regarding your rights as a participant in this study, you may contact AIR's IRB chair at IRB@air.org or 1-800-634-0797.

If you decide to complete and return this survey, you are indicating that you understand and agree to the above.

Purpose of the survey	This survey will help us understand how school and district policies and your role and practices as a School Site Council member change over time as this Initiative is rolled out, if at all.
Confidentiality	Your answers to the questions in this survey will be kept strictly confidential. Results from this survey will never be presented in a way that would permit any response to be associated with a specific school or individual. AIR staff will have access to individual data, but we will not know who each respondent is. Only aggregate results- not individual responses- will be provided to Twin Rivers district staff. For example, we will tell Twin Rivers how many pilot school SSC members agree with a certain statement compared to how many of those at non-pilot schools.
Benefits	Your participation gives you the opportunity to share information about your experiences with the SSFR Initiative on the School Site Council. Confidential, aggregate feedback based on the results of this survey will be provided to district leaders. This will provide district leaders with accurate and complete information about SSC experiences with this Initiative. The district's goal is to use this information to improve the SSFR Initiative.

Freedom to withdraw

Your participation in this survey is voluntary. You have the right to stop participating at any time without penalty. However, we encourage you to participate, as your input is critical to understanding how SSFR policies are affecting schools and SSCs.

Risks and discomforts

There are no foreseeable risks associated with participation other than the inadvertent release of the data. However, to minimize this risk, there will be no names included on surveys, and you are being asked to place your survey into an envelope with all other surveys to return directly to AIR so no one at Twin Rivers can see your responses when you turn it in. At AIR, surveys will be seen only by authorized project staff and then stored in a locked cabinet.
